www.ajm-regionalcoalseries.com.au

The Australian Journal of Mining has developed an unrivalled portfolio of regional coal events, which are often held in the heart of where the action is taking place. These events enjoy the wide ranging support of industry, government, suppliers, and the many service areas of Australia's coal industry – the country's largest export earner.

These events present the ideal opportunity for you to join your peers and learn about the latest project advances (large and small), new technologies, and new emerging business, such as coal seam gas and underground coal gasification. You will enjoy the specific regional focus, allowing you to gain a detailed understanding of the drivers and market dynamics of the region in question. The Regional Coal Series provides you with a tailored networking opportunity to expand your contact base and develop new business by coming face to face with the many project developers and proponents.

Leading events for Australia's resources sector

REGIONAL COAL SERIES

2011 AJM REGIONAL COAL SERIES

UPCOMING 2011 REGIONAL COAL SERIES EVENTS

Clarence-Moreton Coal & Energy Conference

14-15 June 2011 | Hilton Brisbane

The Clarence-Moreton Coal & Energy Conference will look at the significant proposed investment in the region including coal mining, underground coal gasification, coal seam gas, geothermal, shale and much more, bringing together the wide variety of explorers, project developers, service providers and government representatives under the one roof.

Bowen Basin Coal & Energy Conference

8-9 August 2011 | Mackay

This two-day conference is an opportunity for you to gain first hand insights on the latest mining developments; the latest port and infrastructure progress; an overview of the opportunities created in the region by the strong demand for Australian coal and the challenges of this burgeoning and growing coal industry.

Galilee Coal & Energy Conference

22-23 November 2011 | Hilton Brisbane

The Galilee Basin represents extraordinary development potential to be a major world scale energy province for central Queensland. It has everything that's in demand – coal, coal gasification, coal to liquids, coal seam gas, geothermal, carbon sequestration opportunities plus much more. Waratah Coal and Hancock Coal are driving the way forward with plans for massive new coal mine development. This event is now in its 3rd year, and will feature the leading project developers and explorers (big and small) all under one roof discussing their exciting plans for the future.
